

VS 16 WRD WIRED VIBRATION SENSOR

1. Introduction:

VS 16WRD vibration has compact Appearance, easy operation and Convenient installation, strong applicability. Accurately send alarming Signals effectively detect violence intruders

2. Technical details:

Model: MD-2017
 Temperature: 550 C
 Detecting methods: wired linkage
 Output: NC response time is less than 10s

4. Installation

1. Down the sensor shell, then mark the two screw holes on the wall (ONLY HORIZONTAL INSTALLATION)
2. Insert 2 nails on the holes
3. Enclose the emission of the detector to bottom shell.

Note: H surface Up: High sensitivity
 M surface Up: moderate sensitivity
 L surface Up: Low sensitivity

Chart 2

[Chart 2 shows High sensitivity]

4. The detector can be used along with alarm panel and the zone responding time is less than 10ms or vibration analysis instruments

5. Connection Diagram:
